

Dream Bedroom Mini-Project

Synopsis

Imagine that you won a \$100,000 Dream Bedroom extension to your house. You can design the ultimate bedroom. You will create a basic floor plan of your bedroom. You will also write a five-paragraph description of your bedroom.

Overview

What features would you want to have in your bedroom? Think about your closet, bathroom, windows, flooring, paint, and design features. What amenities would you have (e.g. pool table, hot tub, video game system, stereo, bowling alley, TV, etc.)? How many windows and doors will you have? Will you include a porch, deck, terrace, atrium, or other outdoor structure? Will all your walls be straight or will you have curved, slanted, or diagonal walls? Will your bedroom be more than one story? Think about how you'll include furniture and appliances.

Floor Plan

Each square represents one foot and the maximum size of your bedroom is 1200 square feet. Use the graph paper, a ruler, and pencil to create the floor plan and measure each section of your room and add the total square footage. Use simple outlines of furniture pieces, and clearly designate doors, windows, skylights, and other structural components.

Written Description

Your story will be at least five paragraphs in length.

- Introduction: Provide a brief overview of your dream bedroom
- Physical layout of your bedroom (e.g. rooms, windows, and structure)
- Design features (e.g. flooring, paint, and decorations)
- Amenities (e.g. electronics, furniture, stuff)
- Conclusion: What are your favorite features of your dream bedroom and how will building it change your life?

Please be creative and realistic. Have fun!
